

## PRODUCT SHEET

# ROPE HOPE

RPROHO-4407

Specialized in common design approach. Mr. Sep Verboom (1990) has worked with communities and craftsmen around the world, with a great concern for nature, ethnical groups and their traditions. His work adds another dimension to designs, which he launches under the awarded organization, LIVABLE, a family of projects encouraging collaboration, as well as connecting design, industry and communities. PAPILIO recognizes many of its own values in the approach of Sep and his strive for transparent, durable design. That's why we decided to support and guide him in the development of a new collection. It goes without saying that we are very proud to be part of it! More info: <https://livable.world/e/projecten/rope-hope>
